MINES AND MINING STOCKS.

FINANCIAL AND COMMERCIAL.

DIVIDENDS ARE COMING LIVELY

Grand Central and Victoria Get to Front With Distributions.

ORE AND BULLION MARKET

Two more of Utah's mining compasies came to the front yesterday with dividends that are to be distributed in or so. time for the lucky shareholders to get out and patronize the Christmas market. They are the Grand Central and Victoria companies, with mines at Tintic and headquarters in Provo.

The amount to be paid by the Grand Central company is \$12,500, or 5c a share. Books for the transfer of stock will close on Tuesday next, at noon, and payment is to be made on the same

tion of two more smelters is assured. The rise in some stocks has been sensational, Red Top especially so, carrying the market with it.

Tonopahs all have a firm look, Belmont and Midway especially, but Montana appears weak. This company has about \$100,000 in the treasury, but it l be necessary to expend about \$50,-in repairing hoists, shafts, etc., which almost clinches the skipping

of another dividend. Midway is showing up wonderfully and great ore bodies are being blocked out. This company will continue divi-dends quarterly at 5 cents, with all indications of an increase towards the middle of next year. Stock should be bought and put away, as insiders are picking it up at those prices, and have taken considerable stock from the market. McNamara annual meeting comes next week. Stock looks high mough at present figures.

Reports from Tonopah show Belmont to be the future mine of that district. Immense bodies of ore are blocked out and last week's shipments amounted to 390 tons, averaging over \$190.00. Eastern points continue to buy, and \$200,000 in the treasury. Their ship ments will continue and all indications point to a dividend the early part of next year, probably of 10 cents. It looks best of all the Tonopahs at present. North Star shows great activity, going from 39 to 48 cents. I am reliably informed that an eastern syndicate is now dealing with Golden and Ramsey for their control and that Frank Keith, of the Tonopah Mining company, is examining the property for them. If a sale is made the stock will go to over 60 cents. The present owners are responsible for low prices. having sold considerable stock. Gold Mountain is showing up excellently, and the stock is being bought by the east. Control is held by Nixon, Wingfield and Brougher, and should make a great property in the festives. great property in the future. Jim Butler sold down to 62 cents. The great weakness is due to pressure of selling orders from eastern points. Little work is being done on the property, but the directors have promised to force things

Tonopah common sold from \$13.00 to \$14.50, but is now somewhat weaker at S14.50. Railroad earnings and ore shipments from the company's mines continue very large, and it is predicted the dividend will be increased to 50 cents after the coming quarter. Tonopah Extension is inactive, ore ship-ments are not very large, Schwab and crowd protecting the stock, very little being affoat. Pittsburg is buying at \$5,75, which is a healthy indication. Golden Anchor is being picked up by the inside crowd, although Pittsburg has been selling, keeping stock down. Stock is well thought of in Tonopah and will surely do better. West End continues systematic development; stock is low at \$1.221/2 and will also sell higher, carrying Ohio Tonopan with it. The latter looks cheap at 25 cents. Tonopah Home is being slowly cornered by Pittsburg capital, they having bought over 100,000 shares dur-ing the past two weeks. So far the mine shows no ore, but its location

Red Top jumped from 75 cents to \$1.05 and, outside of very rich ore bodles already uncovered, can find no reason for it, although continued rumors say some syndicate is after the property. It has a bullish appearance at 95 cents bid, and insiders are not selling, which makes stock offerings extremely scarce. It is the best developed mine in Goldfield, and should sell higher. Goldfield, Sandstorm, Kondall and Jumbo show no new development, out the usual rich ore and developnent work continues, and their trength is purely due to sympathetic

improve, and all indications point that due largely to the fact that the smel-

WEEK'S SETTLEMENTS CUT kets now have every indication of strength, and while they may go a little Both the Goldfield and Tonopah marlower, it certainly looks as if after the new year all of the stocks will sell Bullfrog is very inactive and no new developments have been reported from the districts, and I lock for no higher prices for next month

CRESCENT BEGINS TO MOVE.

Strong Combination Takes Hold of the Tiger Mine.

The amount to be paid by the Grand Central company is \$13,500, or 5c share. Books for the transfer of stock will close on Tuesday next, at noon and payment is to be made on the same day as those fixed by the Grand Central company.

The Silver King company of Paris City made its December distribution of \$100,000, or 5c 2-5c per share, yesterday. The Dally-West's \$100,000 will be paid on the 20th as will also the Uncle Sam's \$5.000. The Consolidated Mercur company's \$25,000. The Consolidated Mer Crescent, Nev., Dec. 7 .- It is remark-

There are many other promising pros-pects in the district now commanding the attention of outside capitalists, the de-velopment of which will mean much to the state of Nevada and Crescent dis-trict in particular.

ALTA SHY OF COAL.

Camp Is Likely to Suffer if Relief Is Not Soon Coming.

Cold weather and a shortage of coal is causing a feeling of uneasiness to pervade the camp of Alta. Manager Henry M. Crowther of the Continental company's properties returned from a several days' trip to camp Friday evening, and he says that relief must come or it will soon be a pretty cold region to live in. While the camp does not require much fuel for the generation of power, that being mostly sup-plied from the electric plants where the energy is generated by water, coal is everywhere needed for heating, cook-ing and kindred purposes. Coal has been promised for several days, but it seems impossible to get it and in the meantime supplies are being rapidly exhausted.

keep the milling plants running coal must be supplied for heating purroses and the commodity is just as essential to the welfare of the men who live at the company boarding houses and to the families in the private

From Wasatch to Alta the roads are n the finest condition imaginable for teaming, and with everything on runners instead of wheels, it would be pos-sible for the freighters to take up heavy loads if the coal companies seavy loads if the coal companies could fill orders for them. Right now is the time that everybody has been looking forward to in order to get in their winter supplies, and the fear is expressed that by the time coal is to be had the roads will not be in shape to have heavy loads over the companies.

to haul heavy loads over.

A great deal of work is going on in the camp, and the operating companies have been calculating upon a livelier winter's campaign than the camp has seen in many years. If a fuel famine is to be faced the district will suffer a setback that will be deplorable.

STILL SACKING ORE.

rior as Looking Fine.

George Wilson returned yesterday morning from a trip into Humboldt county, Nevada, where he has been on mining business, the nature of which he is not yet at liberty to reveal, other than to say that it had to do with a deal of more than ord nary moment that would probably require some time to round out.

Mr. Wilson was one of the original organizers of the Nevada-Superior company, and he still serves as a director in the company with which he is most prominently identified. During his trip he found linte to visit the property and at Humboldt station he met erty and at Humboldt station he me erty and at Humboldt station he met Manager Ford W. Corpell going in camp. Mr. Wilson states that every day's development on the 100-foot level of the property makes it more certain that the mine is destined to turn out big. Superintendent John M. Harrington is realized. ton is sacking fine ore every day, and within the coming week he will have started the shaft down again. Manager Ford declared that there would be no let-up in sluking until the 200along the vein on the 200 and 300 levels

ORE AND BULLION.

Settlements in Open Market for the Week Cut Close to Record.

Not since last February has a single deeling with Redtop and the excellent ocation of the properties. Adams, Dixle and St. Ives have been slaughered by insiders, depressing prices considerably, and if the Goldfield martet continues firm this latter stock will

Ore Worth Two Dollars a Pound Un-

covered in Logan Canyon Mine. covered in Logan Canyon Mine.

Logan, Dec. 9.—P. A. Nielsen, principal owner of the Lucky Star mine. in which a new strike was made last week, came down from the claim vesterday, after having worked for several days in exploring the new ore body. He brought down some of the finest are ever seen here, large pieces of it showing values in copper, gold and silver of over \$2 a pound. He says his men have uncovered a galena vein fourteen feet wide, and in this is a rich streak of the copper and silver ore that is about two feet wide.

Big masses of the ore are blue with bromides, which, with the gray copper and galena, forms wonderfully rich-locking and beautiful ore. A force of men are at work taking out the ore.

Another New Mining Company.

The Jumbo-Waverly Mining company, with seven claims in Spring Creek district, Juab county, filed articles of incorporation in the office of the secretary of state yesterday. The company is capitalized for \$120.000, divided into shares of a par value of 10 cents each. T. R. Ellerbeck is president; W. L. Ellerbeck, vice president, and G. E. Ellerbeck secretary and treasurer. retary and treasurer.

MINING STOCK EXCHANGE.

Weck Just Ended Developed Unusual Spurt in All Stocks.

usual Spurt in All Stocks.

The total number of shares which changed hands on the mining stock exchange during the week ending yesterday was 253,372, with a selling value of \$73,343,44. Brokers welcomed the spurt which the market took the previous week, when 194,510 shares, with a selling value of \$75,539,88, changed hands, but this week's figures set a much liveller pace. Little Bell and Ontario are the two stocks which attracted most attention during the week in the upward movement. Little Bell was a good daily performer and moved up during the week from \$2.70 to \$5,50, at which figure 400 shares changed hands yesterday. Outario advanced frem \$2.10 to \$3,25 bid, open call, and there was none to get at that figure.

call, and there was none to get at that figure.
Daly, with half a dozen others, joined in the advance movement, \$1.50 being bid, where 90 cents was the best a week ago. The tone of the entire market is firm and there is every indication that the coming week will witness no reaction.
During the regular and open Saturday morning calls, 28,500 shares of stock, with a selling value of \$1.267.38, changed hands.
During the corresponding forencon of 1904, 25,575 shares, with a selling value of \$23,37, changed hands.
Following are the list of final quotations and record of sales during the regular and open Saturday morning calls:

Shares sold, 25.75%, Selling value, [11,267.38, Utah Stocks in Boston.

James A. Pollock & Co., bankers and wakers, yesterday received over their rivate wire from Paine, Webber & Co., me of their Boston correspondents, the ecord of sales of Utah stocks on the loston market, with range and closing potentions:

montations:

Boston, Dec. 3.—The market looked overbought at the close. North Butte was very erratic, selling down 2½ points on sales of only 150 shares. Range came out freely between \$2 and \$3. Boston Consolidated was freely sold from New York. Altogether it looks as if we might have a little reaction the first of this week, after which we would buy stocks again if the money situation gets easier. Quetations:

Treasury Statement. Washington, Dec. 9.—Today's statement of the balances in the general fund shows: Available cash balance, \$137.34.-560; gold coin and bulion, \$87,627.321; gold certificates, \$35.026.240.

The Bank Statement. New York, Dec. 9.—The weekly bank statement of the clearing house banks for this week shows a deficit of \$1,246,525. The statement is as follows:

Loans, \$1,016,320,800; decrease, \$7,561,500. Deposits, \$992,235,700; decrease, \$14,336.

week there was a surplus of \$2,565,375. Imaking a decrease for this week of \$3.519.00.

Ex. U. S. deposits there is a surplus of \$2,655,375. The Copper Handbook is conceded to be the property.

The Copper Handbook is conceded to be the property of the property.

The Copper Handbook is conceded to be the property of the second time this year showing a deficiency in reserve. Such deficit was, however, smaller by \$1,782.375 than it was on Nov. II, on which occasion it was \$2,428,890. In the interval of four weeks the surplus recovered to \$9,157,100 Nov. 55. but the reduction therein of nearly six and two-thirds millions in the week of Nov. 2—largely because of an increase in loans and consequently in deposits, which latter affected reserve requirements—carried the surplus to so low a point as seemingly to foreshadow the deficiency in reserve which is above noted. It would seem that the unmistakable indications of a deficiency last week that were disclosed by current direct movements of money out of the banks and through sub-treasury operations should have resulted in more extensive contraction in loans than was effected, thus reducing deposits and preventing the extinguishment of the surplus. There appears, however, to have been only the mere loan contraction of \$7.561,590 last week, possibly due to excessive requirements for accommodation for stock speculation.

The cash legs was \$1,546,00, which sum was much greater than the biologic of \$2.550.375. The Copper Handbook is conceded to be the copper to the surplus of the metal.

The miner needs the book for the facts it gives him about mines, mining and the metal.

The investor needs the book for the facts it gives him about mines, mining and the metal.

The investor needs the book for the facts it gives him about mines, mining and the metal.

The investor needs the book for the set gives him about mines, mining and the metal.

The investor needs the book for the facts it gives him about mines, mining and the metal.

The investor needs the book for the facts it giv

cessive requirements for accommodation for stock speculation.

The cash less was \$7.546,100, which sum was much greater than the highest of the estimates that were based upon the traceable movements of money during the week. The heavy loss seemed to indicate that if money was attracted to this center from interior cities to the extent that was expected for the purpose of taking advantage of the high rates for loans at call, it arrived too late to be fully reflected in the statement.

GRAIN AND PROVISIONS.

Chicago, Dec. 2.—A firm tone prevailed in the wheat market throughout the day. The feature of trading was covering by shorts, but business was not large. One of the main factors in the situation was the continued reports of sma'l arrivals of wheat at Minneapolis and Duluth and the consequent frim tone of the northwestern markets. Onether factor was comparative firmness of the wheat market at Liverpool, where prices showed comparative firmness of the wheat market at Liverpool, where prices showed only a slight decline, notwithstanding the slump of sesterday in the local market. May opened \$40% higher, at \$85,085% and \$50,085% and \$5 Trading was active in the oats market.
